# China's Largest RF/Microwave and High-Speed Digital Conference & Exhibition

EDI CON celebrates electronic design innovation, bringing together RF, microwave, EMC/EMI, and SI/PI engineers and system integrators for networking, training, and learning. Attendees come to EDI CON to find solutions, products, and design ideas that they can put into immediate practice for today's communication, consumer electronics, aerospace, and medical industries.

## Conference Technical Sessions

Selected by the Technical Advisory Committee through a Call for Abstracts, the EDI CON technical sessions are educational, providing practical information on how to address today's design challenges.

## Sponsored Workshops

The 30-minute workshops allow industry experts to share information on specific topics related to high-frequency or high-speed electronic design. Sponsors are responsible for content according to the guidelines set by the EDI CON organizers. Sponsors receive full contact leads of their workshop attendees.

## Global Exhibition

The exhibition features innovative product displays, demonstrations, networking, and awards opportunities. Showcase your company's products and services to key decision makers and qualified buyers with your booth on the exhibition floor. Sponsorships and booth costs are:
